

RECORD YOUR MEETINGS WITH CR9500
PROFESSIONAL 2 CHANNEL 360° RECORDING SOLUTION

Recording a board meeting or other large gathering has never been easier. With only one lightweight high-quality case you can carry everything you need for your important meetings. With the DS-9500, designed for recording excellent quality sound, you can quickly and easily plug in the four omnidirectional ME-33 microphones for recording of extended periods of time in high quality stereo sound. Plug in the included AC adapter for even longer recording needs. After the meeting is complete transfer audio files via WiFi directly from the DS-9500 recorder and share instantly with coworkers. The supplied Olympus ODMS software allows you to organize, edit, combine, divide, and rename conference files as needed.

The CR9500 Conference Kit with powerful, omnidirectional ME-33 microphones, is built to record voices from a distance - even in the largest conference rooms.

Combine with Optional AS-9000 Transcription Kit featuring a footswitch, headset, and transcription software offering four supported playback modes - stereo, mono, left mic and right mic.

CR-21 Docking Station Highlights

This docking station for the DS-9500 is the professional add-on, which allows you to transfer your dictations via USB or LAN. Connected with an Olympus AC-Adapter it charges your DS-9500 in half the time than via USB connection (USB only: 4 hours).

- Charging and dictation transfer via USB with DS-9500
- Multi-function cradle
- LAN connection for areas where Wi-Fi is not available
- Fast charging
- PC connection
- Playback control via Optional footswitch
- Hands-free dictation via Optional footswitch
- Dedicated connector for voice recorder
- Kensington lock can be connected

ME-33 Omni-directional microphones (4)

The ME-33 boundary microphone is the next generation of omni-directional sound capture equipment from Olympus. Combined with an Olympus professional voice recorder, the ME-33 is the ideal solution for recording meetings, conference calls and more in large rooms with many attendees.

The ME-33 boundary microphone is purpose-built to clearly record voice at a distance. It automatically cuts extremely high- and low-frequency sounds, improving audio quality and recording usability.

RECORD FROM A DISTANCE

The ME-33 is a powerful, omni-directional microphone designed to record voices from a distance – even in the largest conference rooms.

SUPERIOR SOUND QUALITY

By automatically cutting extremely high- and low-frequency sounds, the ME-33 consistently produces clear, usable audio files.

- Ideal solution for recording meetings
- 360° voice pickup
- Superior sound quality
- Purpose-built for voice captures
- Stereo recording possible
- Expandable with up to 2 additional ME-33 mics

F-5AC Adapter

When recording long meetings and conferences, using an AC Adapter is critical. Olympus F-5AC will keep your recorder running and charge your battery at the same time.

ODMS Software – Dictation Module

The ODMS Release 7 software suite provides an intuitive and enhanced user experience that is capable of handling new efficient workflow capabilities.

FLEXIBLE, AUTOMATIC FILE ROUTING WORKFLOW

Dictation files are automatically sent to predetermined destinations via network server, email, or FTP using either WIFI, LAN, or a USB connection.

TRUSTED DATA SECURITY THROUGH STANDARD OLYMPUS ENCRYPTION

An instant 256-bit file encryption with DSS Pro-Format secures your dictation and ensures only authorized listeners can access it. Customizable backup feature allows trusted storage of your files and protection against accidental data loss.

QUICK INSTALLATION AND CONFIGURATION

The New Start up wizard creates a fast and easy process that will get your organization running quickly. It will guide you to set-up your network, shared file folders and/or e-mail settings to route your dictation files to meet your needs.

SIMPLE AND INTUITIVE REDESIGNED USER INTERFACE

Navigate the interface with ease thanks to an improved design and intuitive placement of common tools. Boost productivity and efficiency with easily customizable icons and settings to align with user preferences.

Olympus Carrying Case

This Olympus case has black/gray patterned interior, adjustable/removable padded compartments, shoulder strap, plus 3 large zippered compartments. It will keep your conference kit protected and organized. It has enough space to accommodate 2 additional microphones and other accessories.
